

# **SDRs for Vendor Shipments**

# Vendor Shipments

- **SDR types:**
  - New procurement deliveries to depot storage (type 9)
  - Direct vendor shipments of requisitioned items (type 6)
  - Transshipper SDRs (type W)
- **Control numbers required to associate discrepancy with specific shipment**
  - Contract Number (*Procurement Instrument/Instruction Identification Number (PIIN)*)
  - Shipment Number
  - CLIN/SLIN
  - Call/Order Number *Supplemental Procurement Instrument Identification Number (SPIIN)*

# Definitions

- **Procurement Instrument Identification Number (PIIN)** -an identifier that consists of 13 alpha-numeric characters grouped to convey certain information. The first six numbers are the DoDAAC; seven and eight are the fiscal year the PIIN was assigned; 9 is a letter representing the instrument type; and 10-13 are the four digit serial number (see DFARS 204.70).
- **Supplemental Procurement Instrument Identification Number (SPIIN)** -an identifier assigned to actions under a PIIN. This number is used to identify amendments to solicitations, modifications to contracts and agreements, calls or orders under contracts, basic ordering agreements, or blanket purchase agreements (see DFARS 204.70).
- **Contract Line Item Number (CLIN)** - a Contract Line Item Number is a four digit number that identifies separately identifiable or deliverable supplies or services (see DFARS 204.71).
- **Sub Line Item Number (SLIN)** - a Sub Line Item Number is a six digit identifier used to identify and distinguish elements of a contract line item. It can be either informational (a not separately deliverable aspect of the line item identified by a two digit numeric suffix to the CLIN) or separately identified for delivery (identified by a two alpha character suffix to the CLIN) (see DFARS 204.71).
- **Shipment Number** - a number assigned by contractor to identify each individual shipment (see DFARS F-301, block 2). A shipment number has a three-position alpha character prefix and a four-position numeric or alpha-numeric serial number. A shipment number suffix code is a one-position number attached to the shipment number (end the shipment number with a "Z").

# SDR Gaps

- **System interfaces not supporting data capture**
  - **Customer has MILSTRIP AB\_ with contract number and order number**
  - **Depot PMR for new procurement has contract, CLIN, and order numbers**
  - **WAWF ASN provides all relevant numbers**
- **SDR data fields for relevant numbers and vendor CAGE**
- **Explore WAWF interface for WebSDR**
